

Community Sexual Health Clinics now at Derbyshire LGBT+ Centres

Derbyshire LGBT+ is now hosting **community sexual health clinics** at their Chesterfield and Derby centres!

In partnership with **Derbyshire Community Health Services NHS Foundation Trust**, these clinics provide essential sexual health services tailored for our LGBT+ community, including:

- **PrEP (Pre-Exposure Prophylaxis)** – A highly effective medication that reduces the risk of HIV transmission.
- **STI Screening & Testing** – Quick, confidential, and hassle-free testing for sexually transmitted infections
- **Vaccinations** – Protection against infection.
- **Contraception** – Inclusive options for all identities.

The clinics run **every month**, alternating between our **Chesterfield** and **Derby** centres, making sexual health care more accessible than ever in a safe, inclusive, and welcoming space.

The **first clinic took place in Derby in January** and was incredibly well attended—showing just how much these services are needed in our community!

Next Clinic: February at our Chesterfield Centre – Date TBC

Keep an eye on Derbyshire LGBT+ **social media** for updates and you can book your appointment [here](#).
